Election/Restrictions

I. Claims 1-43 and 78, drawn to a genetically engineered living stent generated by a method comprised of culturing a population of cells to allow formation of a tissue sheet which can be formed into a tubular structure where at least one cell is transfected with an exogenous polynucleotide to form a genetically engineered living stent, and a genetically engineered tissue sheet classified in class 424, subclass 93.21, for example.

II. Claims 44-77, drawn to a living stent generated by a method comprised of culturing a population of cells to allow formation of a tissue sheet which can be contacted with a biocompatible tubular structure to form living stent; a composition comprised of a living stent and a therapeutic agent; and a composition comprised of a tissue sheet of cells formed into a tubular structure, classified in class 424, subclass 93.3, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In
